

1. Image Processing - The app enhance photos
2. Computer Graphics
3. Low-level Vision
4. Intermediate level vision - After extracting features.
5. High-level vision
6. Image formation (Focus)
7. Camera calibration
8. Stereo Vision
9. structure from Motion
10. Medical Image Analysis.
11. Both computer vision and Computer graphics.
12. Perspective Projection
13. Camera calibration
14. Low-level vision - Motion detection identifies.
15. Intermediate - level vision.

16. Computer graphics - VR creates
17. stereo vision / Depth Estimation
18. structure from Motion (SfM)
19. Biometrics (Face Recognition) - Facial texture
20. stereo camera calibration - proper calibration.
